Object:	Commodore 64 C
Museum:	Computerhistorische Sammlung des Zuse-Instituts Berlin Takustraße 7 14195 Berlin
Inventory number:	0xC64C

Description

The Commodore 64 C, C64 C for short, built in 1986, is a redesign of the well-known C64.
The new shape and color of the C64 C is similar to the C128. From a technical point of view,
however, there has only been small progress; the boards in the C64 C have become
narrower. However, this is the only change to the C64 C apart from the design.
Nowadays the official name is used again, but back then the nickname C64 II was used.
The price of the C64 C in 1987 was 498 German marks.
The serial number of this C64 C is 224767.
